

KIRUBIA A

Data Analyst

Chennai, India · +91 93633 33824 · kirubiaabel03@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech graduate in AI & Data Science (CGPA 8.2) with hands-on experience using SQL, Power BI, Tableau, and Python to build dashboards, ETL pipelines, and business-impact analyses on datasets exceeding 150,000 records. Delivered a 12% accuracy improvement in production models and reduced stakeholder ad-hoc reporting time by ~30%.

TECHNICAL SKILLS

- **SQL & Databases:** PostgreSQL — joins, window functions, CTEs; Data Modelling
- **BI & Visualisation:** Power BI (DAX, KPI cards, slicers, drill-through), Tableau (LOD expressions), Excel (Pivot Tables, XLOOKUP, Power Query)
- **Programming:** Python (Pandas, NumPy), R
- **Analytics:** EDA, Statistical Analysis, Hypothesis Testing, A/B Analysis, Data Storytelling, ETL Pipelines
- **ML / GenAI:** Scikit-learn, XGBoost, LangChain, RAG, Prompt Engineering
- **Tools & Cloud:** GCP (BigQuery, Vertex AI), Git & GitHub, Jupyter Notebook, MLflow

PROFESSIONAL EXPERIENCE

Data Science Intern | Gradtwain Services | Sept 2024 – Nov 2024

- Engineered an end-to-end ETL pipeline with feature engineering and hyperparameter tuning via GridSearchCV — boosting production model accuracy by 12%.
- Conducted EDA on real-world multi-feature datasets using Pandas, Matplotlib, and Seaborn; surfaced key outliers, distribution skews, and feature correlations.
- Delivered 4+ stakeholder-ready BI reports translating technical model outputs into clear narratives with annotated charts, KPI summaries, and actionable takeaways for non-technical audiences.

KEY PROJECTS

Nykaa Beauty Brand Review Analysis — Python · SQL · Power BI · VADER

- Engineered ETL pipeline ingesting and cleaning 61,284 customer reviews across 11 brands — handling nulls, duplicates, encoding issues, and schema standardisation before analysis.
- Wrote complex SQL queries (multi-table joins, GROUP BY aggregations, window functions) to segment reviews by brand, rating tier, and time period.
- Designed a 9-visual interactive Power BI dashboard featuring brand slicers, dynamic KPI cards (avg rating, review volume, sentiment score), and trend charts — reduced stakeholder ad-hoc reporting requests by ~30%.

Sales Data Analysis & KPI Dashboard — Python · SQL · Tableau · Excel

- Analysed 9,800+ sales transaction records using SQL and Python; performed cohort analysis, discount-tier segmentation, and deal velocity calculations to map revenue trends across product lines and regions.
- Built a multi-view Tableau KPI dashboard visualising revenue trends, average deal size, and discount rate vs. close rate correlation — adopted as the sales team's primary reporting tool, replacing manual Excel reporting.

Global AI Adoption & Workforce Impact — Python · XGBoost · SHAP · MLflow · Streamlit

- Designed and executed a full ML pipeline on 150,000+ records spanning 20+ industries — data cleaning, feature engineering, SMOTE-based class balancing, XGBoost classification, and K-Means workforce segmentation.
- Integrated SHAP explainability to surface the top drivers of AI adoption by industry, making complex model outputs interpretable for non-technical business stakeholders.

EDUCATION

B.Tech — Artificial Intelligence & Data Science

Saveetha School of Engineering, Chennai | 2021 – 2025 | CGPA: 8.2 / 10

CERTIFICATIONS

- Google Prompt Design in Vertex AI Skill Badge — Google | Jun 2026
- Oracle Cloud Infrastructure GenAI Certified Professional — Oracle | Jul 2024
- Oracle Cloud Infrastructure AI Foundations Associate — Oracle | Aug 2024
- Accenture Data Analytics & Visualisation Job Simulation — Forage | Aug 2024
