KIRUBIA A

+91 9363333824 | kirubiaabel03@gmail.com | LinkedIn | GitHub | Chennai, India

PROFESSIONAL SUMMARY:

Data Science graduate with hands-on experience in Python, SQL, Machine Learning, and data visualization tools including Power BI and Tableau. Skilled in data cleaning, exploratory data analysis (EDA), feature engineering, and building end-to-end machine learning pipelines. Experienced in working with large datasets to extract actionable insights and support data-driven decision-making. Strong interest in applying machine learning and analytics to solve real-world business problems.

TECHNICAL SKILLS:

Programming Languages:	Python, SQL
Libraries & Frameworks:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Machine Learning:	Regression, Classification, Model Evaluation, Feature Engineering
Data Analysis:	Data Cleaning, EDA, Data Transformation, Statistical Analysis
Data Visualization:	Power BI, Tableau, Excel (Pivot Tables, Power Query, XLOOKUP)
Tools & Platforms:	Jupyter Notebook, GitHub, Streamlit, MySQL

PROFESSIONAL EXPERIENCE:

Data Science Intern — Gradtwin Services

Sept 2024 – Nov 2024

- Performed exploratory data analysis (EDA) on real-world datasets to identify trends and patterns
- Built machine learning models (KNN, Random Forest) for predictive analysis
- Applied data preprocessing techniques including data cleaning, encoding, and feature engineering
- Evaluated model performance using accuracy, RMSE, precision, and recall
- Compared multiple models using cross-validation techniques
- Generated insights and presented findings to improve decision-making

PROJECTS:

Global AI Adoption & Workforce Impact (Ongoing)

- Developing a machine learning pipeline on 150,000+ company records
- Built **XGBoost classification model** to predict AI adoption stages
- Applied **K-Means clustering** to segment companies by AI maturity
- Developing an **interactive Streamlit dashboard** for visualization

Technologies: Python, XGBoost, LightGBM, Scikit-learn, Streamlit

India Housing Price Analysis

- Performed data cleaning and exploratory data analysis (EDA) on housing datasets
- Built **interactive Streamlit dashboard** to visualize pricing trends
- Identified location and property type as key price drivers

Technologies: Python, Pandas, Seaborn, Streamlit

Sales Data Analysis

- Analyzed 9,800+ records to evaluate sales performance and profitability
- Built **Tableau dashboards** for KPI tracking and reporting
- Identified impact of discounts on revenue and category performance

Technologies: Python, Tableau, Excel

Bike Sales Analysis

- Cleaned and analyzed sales data to identify key pricing factors
- Evaluated impact of mileage, age, brand, and location on pricing
- Created visualizations to support business insights

Technologies: Python, Excel

Cirrhosis Disease Prediction

- Built **machine learning classification model** for disease prediction
- Applied preprocessing techniques and handled class imbalance
- Evaluated model using accuracy, precision, recall, and F1-score

Technologies: Python, Scikit-learn

EDUCATION:

B.Tech – Artificial Intelligence & Data Science
SIMATS School of Engineering, Chennai
2021 – 2025 | CGPA: 8.2
