KIRUBIA A

+91 9363333824 | kirubiaabel03@gmail.com | LinkedIn | GitHub | Chennai, India

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience in Python, SQL, Machine Learning, and data visualization tools including Power BI and Tableau. Skilled in data cleaning, exploratory data analysis (EDA), feature engineering, and building end-to-end machine learning pipelines. Experienced in working with large datasets to extract actionable insights and support data-driven decision-making. Strong interest in applying machine learning and analytics to solve real-world business problems.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Machine Learning:** Regression, Classification, Clustering, Model Evaluation, Feature Engineering
- **Data Analysis:** Data Cleaning, EDA, Data Transformation, Statistical Analysis
- **Data Visualization:** Power BI, Tableau, Excel (Pivot Tables, Power Query, XLOOKUP)
- **Tools & Platforms:** Jupyter Notebook, GitHub, Streamlit, MySQL

PROFESSIONAL EXPERIENCE

Data Science Intern — **Gradtwin Services** *Sept 2024 – Nov 2024*

- Performed exploratory data analysis (EDA) on real-world datasets to uncover trends, patterns, and actionable insights
- Built and evaluated machine learning models (KNN, Random Forest) for predictive analysis tasks
- Applied data preprocessing techniques including cleaning, encoding, and feature engineering to improve model inputs
- Assessed model performance using accuracy, RMSE, precision, and recall metrics
- Conducted cross-validation and model comparison to identify the best-performing approaches
- Presented analytical findings to stakeholders to support data-driven decision-making

PROJECTS

Global AI Adoption & Workforce Impact | GitHub | Live Demo

- Engineered a full ML pipeline on 150,000+ company records to analyze AI adoption patterns across industries and regions
- Developed an XGBoost classification model to predict AI adoption stages, achieving strong performance across multi-class categories
- Applied K-Means clustering to segment companies by AI maturity level, revealing distinct strategic adoption profiles
- Built an interactive Streamlit dashboard with filters and visualizations for real-time exploration of AI adoption trends

Technologies: *Python, XGBoost, LightGBM, Scikit-learn, Streamlit*

India Housing Price Analysis | GitHub | Live Demo

- Cleaned and analyzed large housing datasets to identify key pricing drivers across Indian cities
- Conducted in-depth EDA revealing location and property type as the strongest predictors of housing prices
- Built an interactive Streamlit dashboard allowing users to explore regional pricing trends and filters

Technologies: *Python, Pandas, Seaborn, Streamlit*

Sales Data Analysis | GitHub

- Analyzed 9,800+ sales records to evaluate performance, profitability, and category-level trends
- Developed Tableau dashboards for KPI tracking, discount impact analysis, and executive reporting
- Identified that excessive discounting in select categories was reducing net revenue, leading to actionable recommendations

Technologies: *Python, Tableau, Excel*

Bike Sales Analysis | GitHub

- Cleaned and analyzed sales data to understand key pricing factors including mileage, age, brand, and location
- Generated data visualizations to highlight market-level patterns and support pricing strategy decisions

Technologies: *Python, Excel*

Cirrhosis Disease Prediction

- Built a multi-class classification model to predict cirrhosis disease stages from clinical patient data
- Handled class imbalance using resampling techniques to improve minority class detection
- Evaluated model robustness using accuracy, precision, recall, and F1-score across all disease stages

Technologies: *Python, Scikit-learn*

EDUCATION

B.Tech – Artificial Intelligence & Data Science

SIMATS School of Engineering, Chennai *2021 – 2025 | CGPA: 8.2*
